The only tested and certified Teleporter Mortar Tub on the Market.
Weights and Measurements Approved

The Flexi Handle

Unique 'Flexi' handle (patented design) allows the handle move when lifted by crane, using different length slings while also maintaining the handle in an upright position to facilitate forklift entry without the need for the driver to dismount.

Lifting

The two unique 'flexi' handles allow the Mortar Tub to be lifted with ease, either by forklift or by crane.

Personalisation

Optional corporate logo that advertises and promotes your company to your customers. Optional identification number which gives you security and control over your mortar tubs.

Liner bags

Sturdy Liner bags ensure a longer life for the mortar tubs and ensures that no solidified mortar remains in the tub. The liner bags also reduce the time required for cleaning and prolongs the onsite useable time for your mortar.

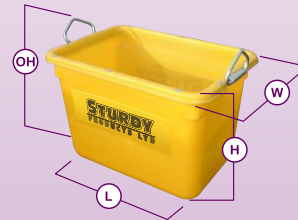

Technical Details
